This week's homework:

- Science/PE – We have learnt about the positive effect exercise has on our lungs, heart and brain this week. Can you create a circuit of different PE activities to help develop the strength in your heart, lungs and brain? Eg 30 seconds of jumping jacks, 30 seconds running on the spot, 30 seconds of rest.
- DT – When you are out and about, have a look at the different vehicles you see on the roads. Discuss how many wheels they have, how the wheels are attached and why different vehicles have different numbers of wheels. Remember to be safe when near vehicles.

Enjoy your weekend everyone, see you on Monday.
